

Get started in micro and nano technology research!

Academic year program runs
October 2023 – May 2024.

Summer 2024 research dates vary by
program and range from 1 to 11 weeks.

MNT-CURN 2023-24

The Micro Nano Technology Collaborative Undergraduate Research Network (MNT-CURN) provides technical education students with the knowledge, skills and connections they need to participate in a research experience and expand their career choices.

Who should apply?

Community College students enrolled in a technical education program or course who are interested in learning about research in micro and nano technologies and participating in a paid summer research experience.

Benefits:

Learn from students and researchers from across the nation who are interested in micro and nano technologies.

Develop skills and get feedback on preparing your resume and application materials.

Participate in academic year and summer projects and research experiences.

\$3000 stipend, in addition to any other grant or stipend for the summer research opportunity.

Learn about scholarship opportunities.

Expectations:

Actively participate in weekly online meetings

Apply for a summer research experience

Participate in summer 2024 research

Provide program feedback
