

IEEE WIE MANGA STORIES

Riko-chan
The Girl Who Solves Everyday Problems Through STEM

INSPIRE A MIND. CHANGE THE FUTURE.

IEEE Women in Engineering (WIE) is proud to present the adventures of Riko-chan, a relatable hero who solves everyday challenges through her ingenuity and STEM skills.

These captivating manga stories, created through a unique contest by IEEE WIE and the IEEE Japan Council, are a powerful tool to bridge the STEM gender gap and empower young minds.

FREE DOWNLOADS AVAILABLE!

Spread the love for STEM and inspire the younger generation!

Inspiring the Next Generation

Informs young students about the significance of pursuing STEM subjects.

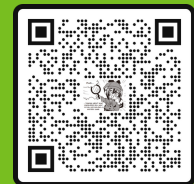

IEEE WIE encourages teachers and parents to share these stories with the younger generation to foster an interest in STEM.

Available in Several Languages

Translated into Japanese, Simplified Chinese, Portuguese, Bangla, Arabic, Turkish, Hindi, French and German, and Spanish.

Enhance your volunteer experience by translating the upcoming manga stories.

Get Involved with the Manga Project

Champion the project. Bring this project to your community by emailing our flyer and a link to the stories to local educators and librarians, offering them this powerful, no-cost resource for their classrooms.
