

2027 KNI SURF-THE-WAVE PRIZE FELLOWSHIP

for undergraduate summer researchers

The Kavli Nanoscience Institute (KNI) at the California Institute of Technology offers named fellowships for motivated undergraduate summer researchers who pursue a nanoscience-related project at Caltech.

Each fellow will develop and conduct research with a faculty mentor and a graduate student or postdoctoral scholar co-mentor over the 10-week immersive program. In addition to exploring science, fellows participate in enriching educational and social activities and discover what life is like at Caltech.

KNI SURF-the-WAVE (STW) prizes are supplemental awards to WAVE Fellowship, which are administered by the Student-Faculty Programs (SFP) office.

The KNI STW prize covers the full WAVE Fellowship salary and includes supplements for on-campus housing & travel. The prize also provides complimentary use of the KNI Laboratory, an advanced nanofabrication shared user facility at Caltech, to enable the fellows' research.

Eligibility

KNI STW named fellowships are open to undergradates who are enrolled at a non-Caltech university, who plan to pursue PhDs in science or engineering, and who meet all Caltech WAVE program requirements. In order to be considered, WAVE applications must be submitted through Caltech's SFP office before the **January 8 deadline.**
